***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 6, it is unclear whether or not the "an upper end of said sheath" in line 6 is the same upper end as claimed previously.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Romero, Jr et al. Romero teaches a cover (Fig. 5; 38) consisting essentially of: a flexible rectangular sheet of textile material (42) secured at its longitudinal sides (via 44,46) to form a tubular sheath with open ends and a constant diameter. At a first end of the sheath is a slit (see Attachment A) and a securement means/drawstrings (48,50) with a retaining means (49,51). Note: only the subcombination is being claimed in claims 1-5.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harmon in view of Romero, Jr. et al. Harmon teaches a cane with a decorative cover thereon (Fig. 1). For claim 6, Harmon fails to teach a cover/sheath made of material and including a slit and securement means at an upper end thereof. Romero teaches a cover with these properties (see 102 rejection above; sheath positionable with slit and drawstring portion at top end thereof) locatable over a tubular member. It would have been obvious to modify the cane assembly of Harmon by using an alternate cover thereon, i.e. using the material cover of Romero thereon instead of the plastic cover presently used, since these covers are functionally equivalent and it appears that either type of cover would work equally well on the cane of Harmon. Furthermore, the cover of Romero (which would be dimensioned to fit over the cane), would be readily removable and machine washable, if desired.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Romero, Jr. et al in view of Muk Kim. As stated above, Romero teaches the limitations of claims 1 and 2, including a cover made of a flexible rectangular sheet of textile material. For claim 3, Romero fails to teach that the material has printing thereon. Muk Kim teaches that textile material with printing thereon is well known in the art (see Fig. 1). Therefore,

it would have been obvious to modify the cover of Romero by using printed textile fabric for the material, for aesthetic purposes, etc.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
